BRAND NAME CREATING USING CANVA

Project description:

Use a brand guideline template to start creating your own style guide. Then, you can build your Canva brand kit by setting up your brand's colour palette, uploading your fonts, and storing your logo right in Canva for easy access across your content. Brand Kit brings all your entire brand together in one place, whether you're starting from scratch or adding your existing assets. Once set up, you can access your brand fonts, logos, colors, icons, imagery, graphics, and pre-designed Brand Templates within the Canva editor to apply the brand as you design. By using this Canva we are going to create a brand name for a travel company which will be useful for the tourists to visit the tourist places all over the world.
